

Mobile Zoom Cart

How do I record?

- When your call is connected, tap **Start Recording** on the Zoom Room Controller
- The cloud recording link will be sent to the host of the scheduled recording
- To stop the recording press **Stop Recording**
- Alternatively auto-recording can be enabled from the Zoom web portal

What can I record?

- ✓ Camera
- ✓ Lapel Microphone
- ✓ Your own device via **HDMI***

** It is not possible to record audio via the HDMI cable from your laptop or tablet. Only the video content will be captured. If audio is essential, please use the Room PC.*

1 Microphones

- The camera bar has microphones built-in that will automatically reject environmental noise.

2 Content

- Connect your presentation device (i.e laptop or tablet) to the **Instructor HDMI** cable.
- Content will start sharing automatically if the cart has host privileges or if participant screen sharing is enabled.

3 Camera

- The camera is able to automatically track and frame individuals in the field of view.
- To toggle this feature, tap the 'Camera Control' button.
- If you wish for the camera to primarily look at an audience, you should disable auto-tracking.
- If the camera will primarily look at an instructor, you may wish to enable it.
